EXPERTISE

Plimsoll supplies all the infrastructure and service hands to manufacture, maintenance and installation of steel structures or rig equipment, general mechanical services and Heavy repairs. We also engineer, manufacture and design offshore structures.

We provide QA/QC, weld inspection, blasting and painting in accordance with our's client procedures.

OBJECTIVE

Give our clients, the best solutions in terms of quality, safety, delivery time and fair price in a execution of a project.

❑ MISSION:

- ENSURE THE SATISFACTION OF OUR CUSTOMERS WITH RESPECT TO TIME, QUALITY AND SERVICE, APPLYING THE TECHNICAL KNOWLEDGE ACQUIRED BY THE ORGANIZATION IN THE IMPLEMENTATION OF ENGINEERING SERVICES, REPAIR, MANUFACTURING AND STRUCTURES MAINTENANCE WITH A ENGAGED TEAM FOCUSED IN RESULTS.

❑ VISION:

- BE RECOGNIZED, UNTIL 2020, AS REFERENCE IN ENGINEERING SERVICES, REPAIR, MANUFACTURING AND STRUCTURES MAINTENANCE ACHIEVING OR EXCEEDING EXPECTATIONS IN THE SERVICES EXECUTED.

☐ CORE VALUES:

- **Quality:** Run our projects in accordance with laws and guidelines is obligation, in addition, we value the quality of execution, where we combine safety, time, respect for customer and employees and respect to enviromental. Quality is presented in everything we do.
- **Teamwok:** The principles governing Plimsoll is reflected in our team: Happy, competent, valued and committed to the work. Our people work as a team and act with integrity, consistency, respect and mutual trust towards to a common goal.
- **Commitment:** More than a simple loyalty to the organization, the commitment is a process by which employees express their concern for the well-being and success of the organization they work for.
- **Trust:** Trust for us is due to a long lasting relationship, engagement, commitment and focus on results. It is reach, or even exceed those of our customers, partners and employees.

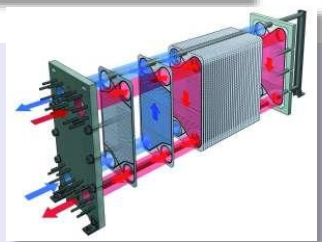

WE ARE ABLE TO SUPPLY

- Engineering;
- Structural Design;
- Structural Calculations;
- Steel structures fabrication and assembly;
- Special Weldments;
- Steel Tanks fabrication;
- Labor Supply (Welders, Fitters, Scaffolding Crew);
- Engine exhaust insulation refurbishment;
- Design, Fabrication, Instalation of Flare Booms;
- FRP Piping repair or installation;
- Steel Pipes installation, refurbishment or Repair;
- Skids DNV2.7-1;

OVER HAUL AND GENERAL MAINTENANCE:

- Pumps (Sea water, Fresh Water, Ejection, cargo);
- Vacum systems;
- Air Compressors;
- Heat Exchangers (Air Coolers, Box Coolers or Water Coolers);
- Valves;
- Sea Chest Valves;
- Deck Equipment;
- Winches (Windless, Deck winches, bell winches);
- Cranes;
- A-Frame;
- Mud Pumps;
- Hydraulic Systems;
- Turn-Key in Torque Services;
- Machining Services;

Project Management

Plimsoll, as an engineer company, can do total project management to our clients with a high quality service in accordance to international standards.

We are able to design new structures, retrofit structures, from the preliminary design to the structural analysis, manufacture and complete installation.

On Heavy Mechanic services, Plimsoll can repair and Over Haul a Large package of equipment and offer one of the best Solutions on oil and Gas Market.

Our qualified technical team acts with efficiency, competency and quality ensuring the clients satisfaction in all related disciplines of a project.

QUALITY

- Comply with the requirements of our customers;
- The projects are conducted in accordance with the requirements of Classification Societies;
- ISO standard of quality in all disciplines related to the project .

SERVICES

- Qualified, trained and dedicated team;
- 24Hours/7days;
- Strategic Alliances.

SAFETY

- In accordance with all international requirements and demands of our customers, optimizing the project and reducing the risks.

With the competence and quality of the Plimsoll team, we are able to carry out projects of maintenance and repair of drill ships, offshore rigs, supply vessels. We can go where ever the vessel is located.

We also count with a support base to our operations at the Naval Base of Aratú – BA.

Fabrication offshore and NDT test are also part of our scope of work. We have professional with all relevant certificates for offshore work and to save time for our client, we are able to perform the fabrication, inspection and paint offshore.

We work at outfitting demands such as handrail, stairs, pipe and valves supports, etc.

Manufacture, Installation and Commissioning

We are able to manufacture, assembly and install clients equipment, be it electric, pneumatic or hydraulic. We help our customers reduce their costs in relation to importation taxes and delays in customs, manufacturing the equipment at our facilities, close to the final client.

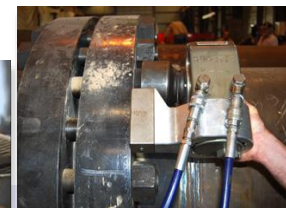

CNC Cutting

At our shop, we have a CNC cutting machine, with capabilities of cutting stainless steel till 19mm with Plasma Torch and Carbon Steel till 200mm with Oxy/Ace cutting.

Structural Cracks Repair

Together with the classification society of the platform or vessel, we can define a procedure for removal of structural cracks and re-welding ensuring that the structure will not suffer structural failure, thus minimizing the repair costs

Faster, Safer and More Accurate

Inline Ratchets increase speed, safety and accuracy.

Right Tool for Any Job

Square Drive Ratchets, Inline Ratchets and Slimline Rack Wrenches provide multiple tool options on every job.

Specialty Tools

Nut Splitters, Bolt Saws, Stud Removers, and more are also available for your toughest bolting job.

Calibrated Tools

Every wrench is tested and calibrated.

Full Time Personnel

7 days a week 24 hours a day.

Torq/Lite®

We have hydraulic torque wrenches for sale or rent, worldwide.

Plimsoll offers complete industrial bolting service to the drilling production industry, as well as plants, refineries, and construction sites throughout the Brazil. Plimsoll Service has facilities located in Macae-RJ and Aratu-BA.

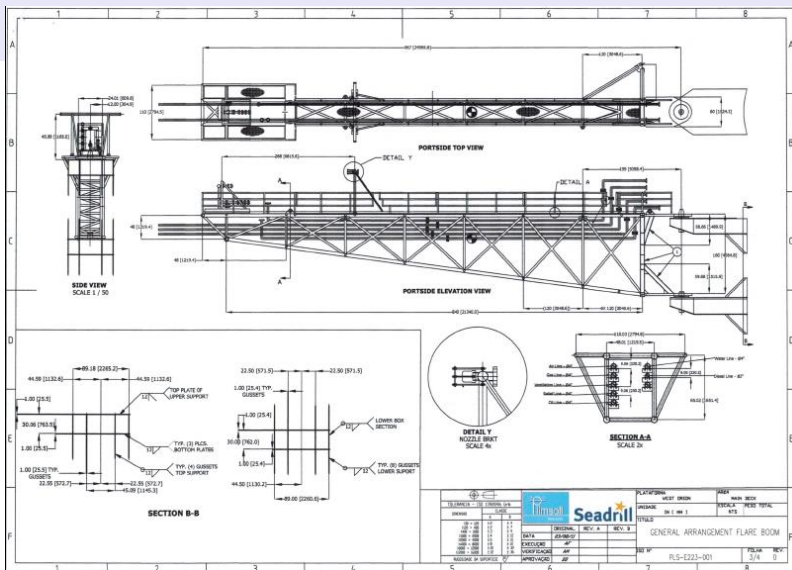

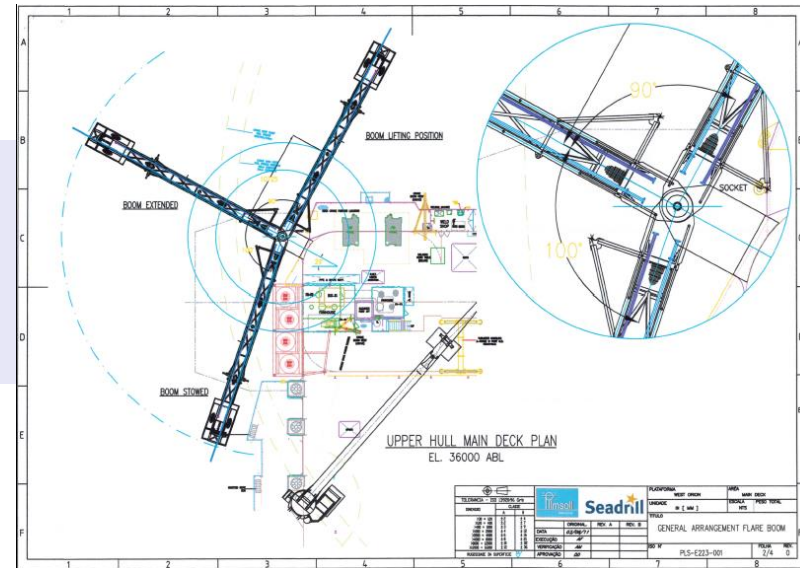

Design, Fabrication and Installation of FLARE BOOM

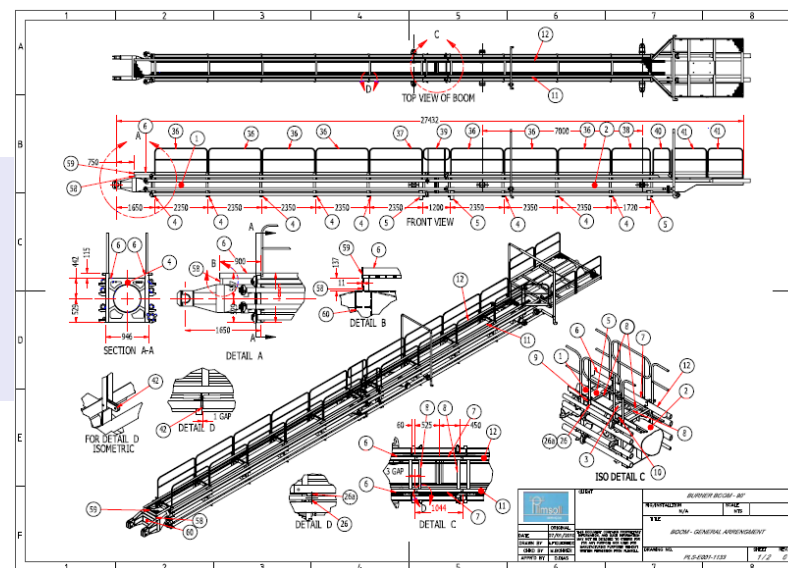

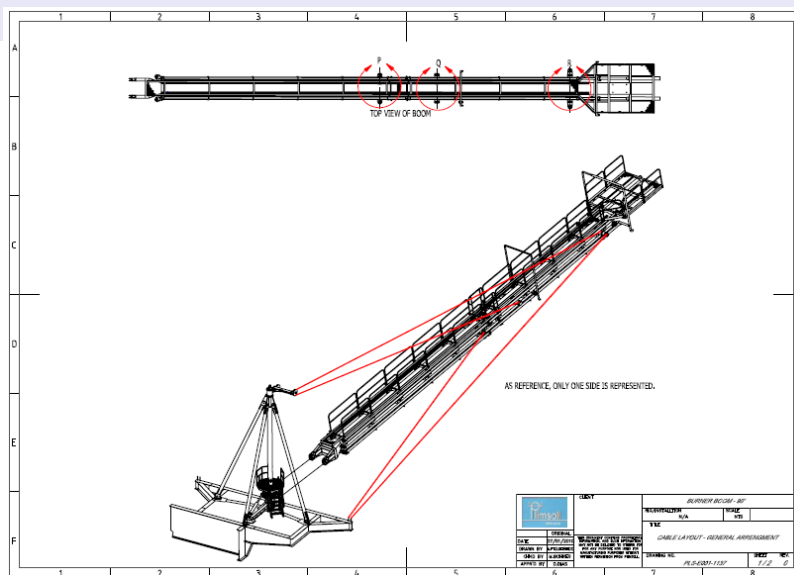

Plimsoll has achieved in the last years a big experience in manufacture, maintenance and installation of Flarebooms. All the flarebooms was fabricated in accordance with the rules and witness of the classification society. In the last couple years, Plimsoll had work on fabrication and installation of several flarebooms. At all installations we had positive results and one more time we achieved the client's satisfaction.

FLARE BOOM – SEMI-SUB DESIGN

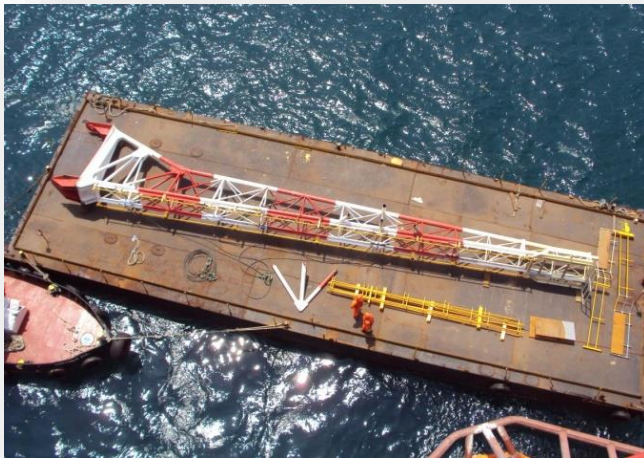

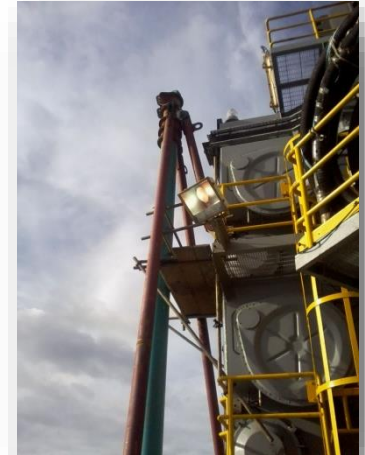

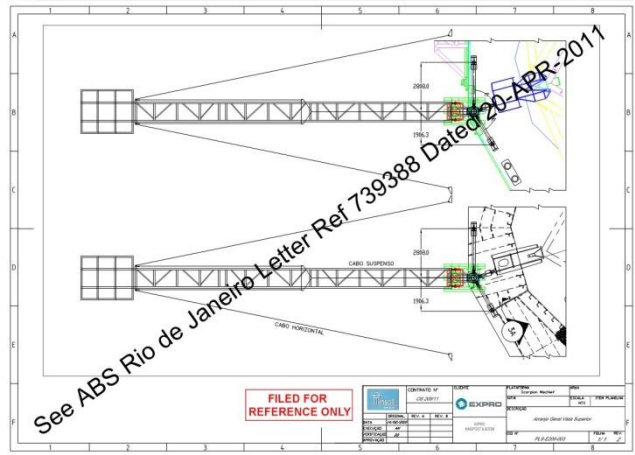

FLARE BOOM – DURING FABRICATION

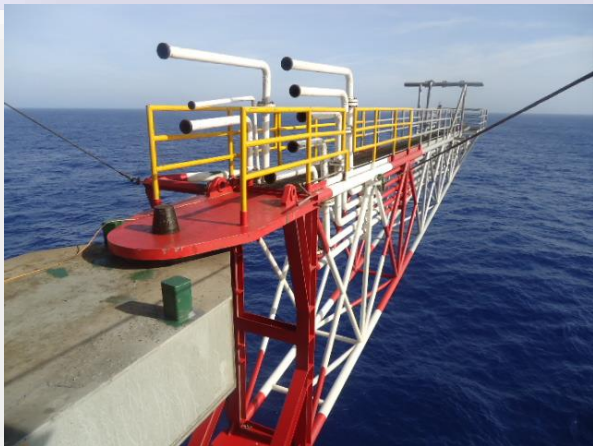

FLARE BOOM – INSTALLATION OFFSHORE

FLARE BOOM - INSTALLATION

FLARE BOOM – FABRICATION AND INSTALLATION

As an engineer company, we also design and built custom made structures for our clients depending on their needs.

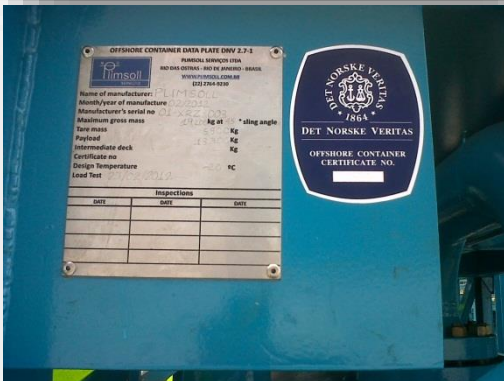

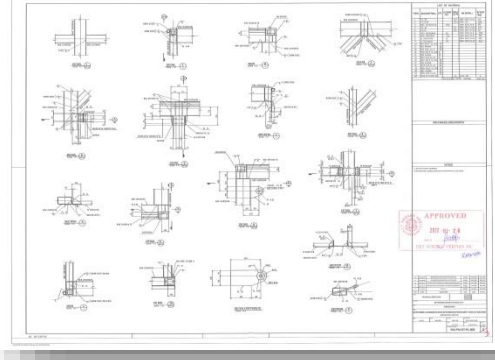

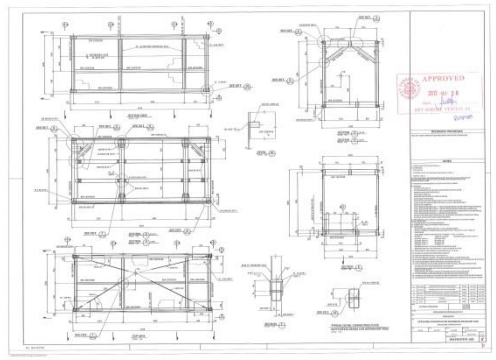

Some times, we just built what is already designed and some times we do the design and built the structures.

At following pages, we show some of the projects that Plimsoll had been working.

CRANE BOOM REST - FABRICATION

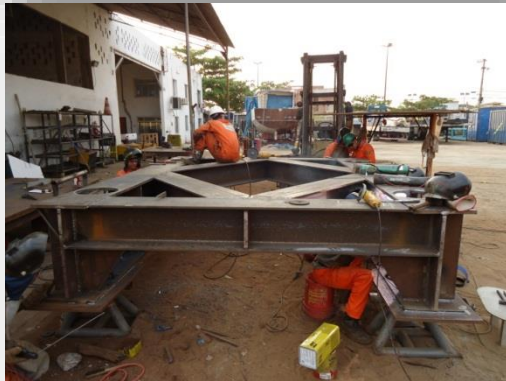

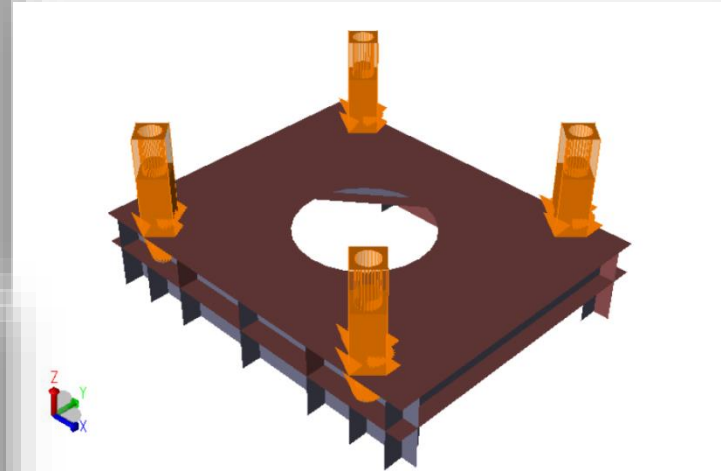

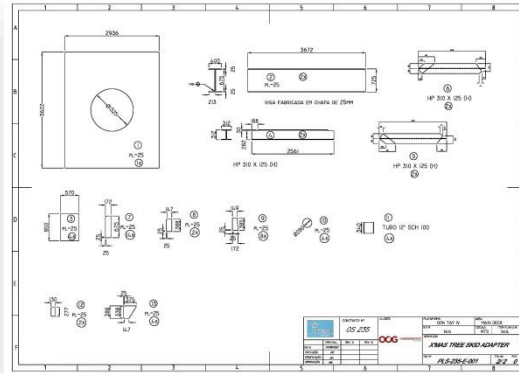

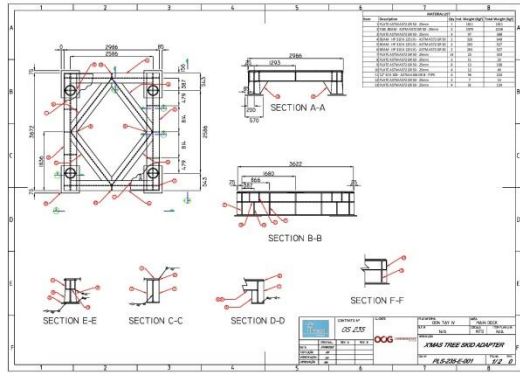

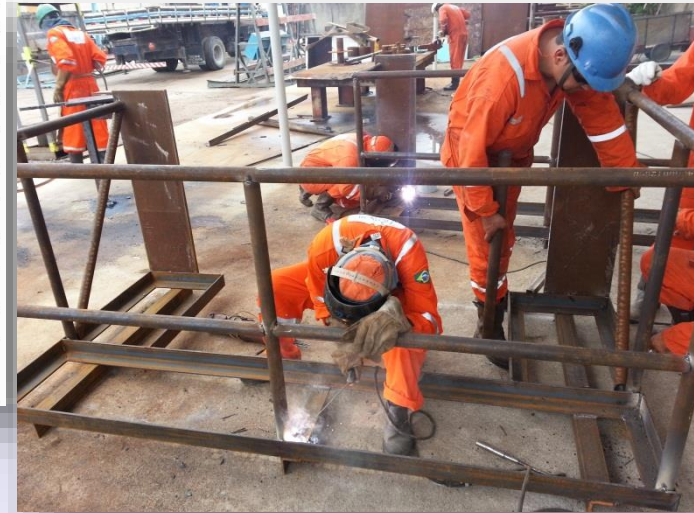

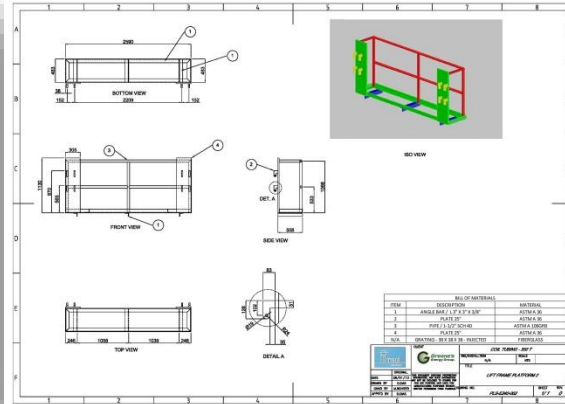

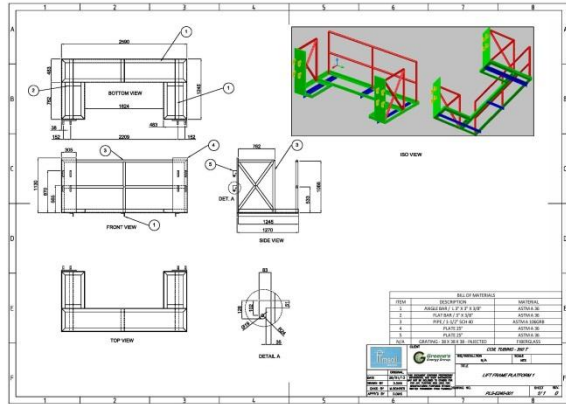

DNV 2.7-1 SKIDS – FABRICATION

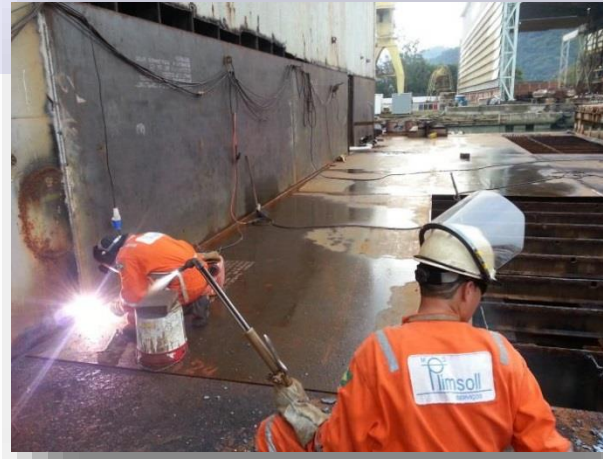

PELICANO 1 – THRUSTER SUPPORTS FABRICATION

DRY DOCK SERVICE REPAIR – STEEL REPLACEMENT

Noble Muravlenko

- Steel plate replacement
- Pipeline replacement
- General outfitting reconstruction (Handrails, stairs, pipe supports).

Noble Roger Eason

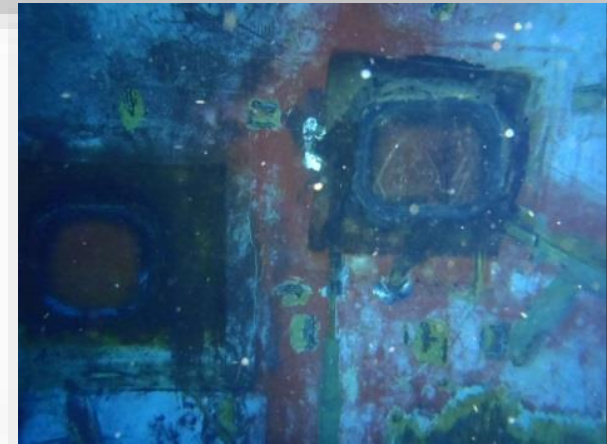

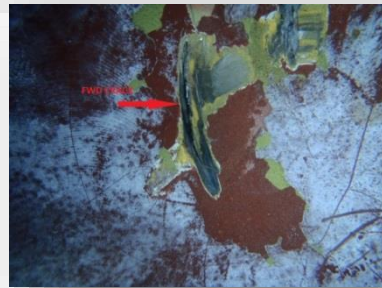

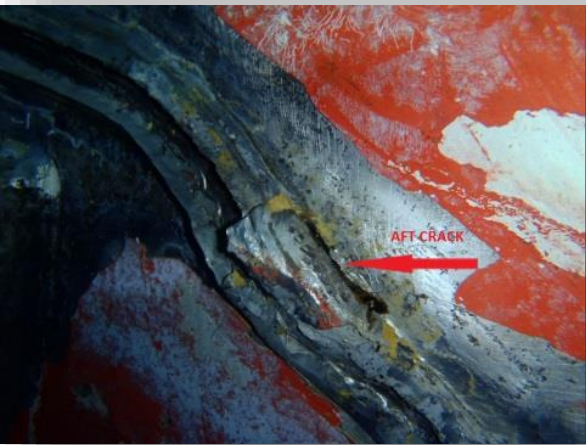

- Main Deck Reinforcement
- Steel plate replacement
- General outfitting reconstruction (Handrails, stairs, pipe supports)
- Superstructure rebuilt

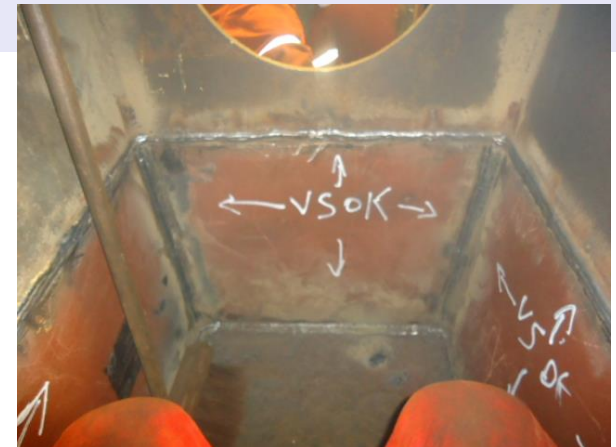

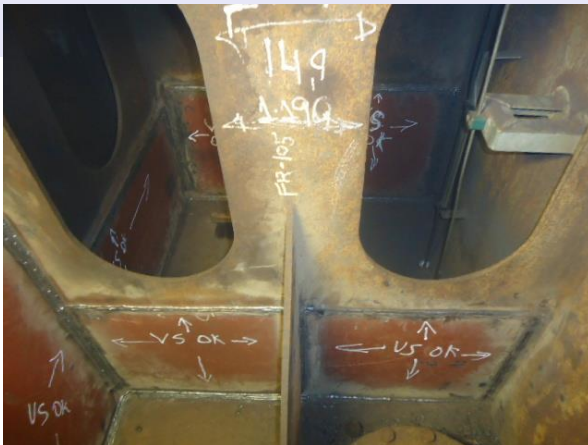

Brute Tide and Nordentor

- Main deck plate replacement
- Wood replacement
- Pull out of shaft, realignment, change of bearings
- Rudder pull out, change of bearings
- Engine room insulation replacement
- Engine room pipelines replacement
- Hull cleaning and Painting

UNDER WATER HULL REPAIR

STEEL REPLACEMENT

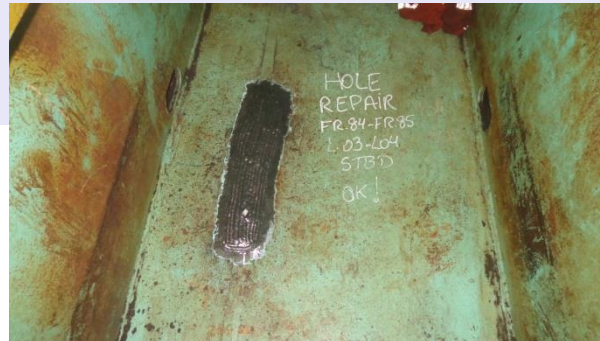

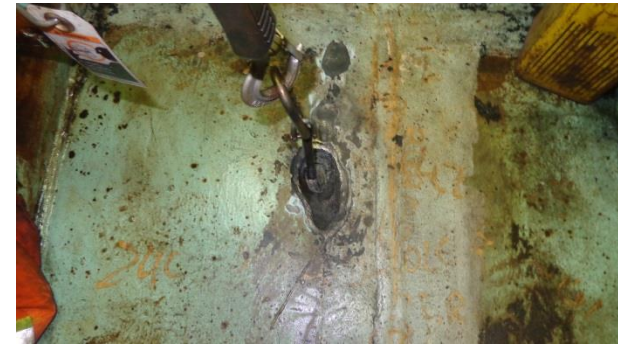

UNDERWATER PIPE RECOVERY PLATFORM

BOTTOM PLATING – PITTING WELD RECONSTRUCTION REPAIR (Approved by Class)

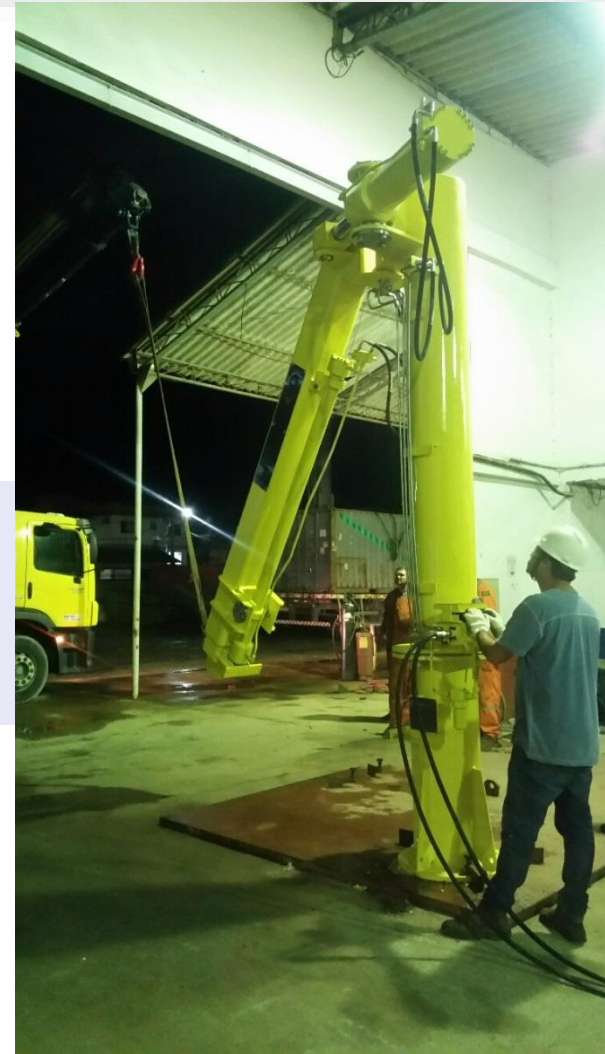

BOTTOM PLATING – HOLE PERMANENT REPAIR – VESSEL IN OPERATION (Approved by Class)

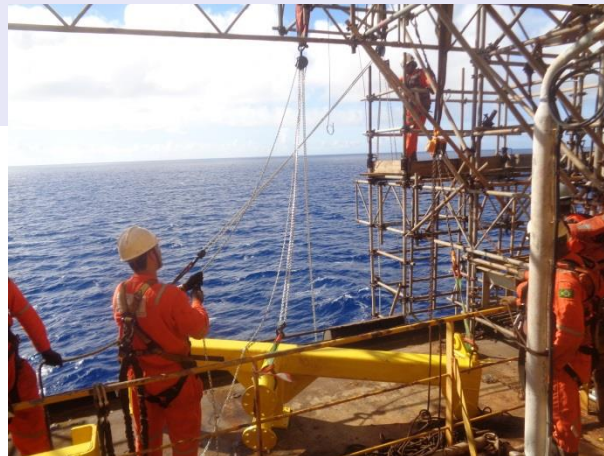

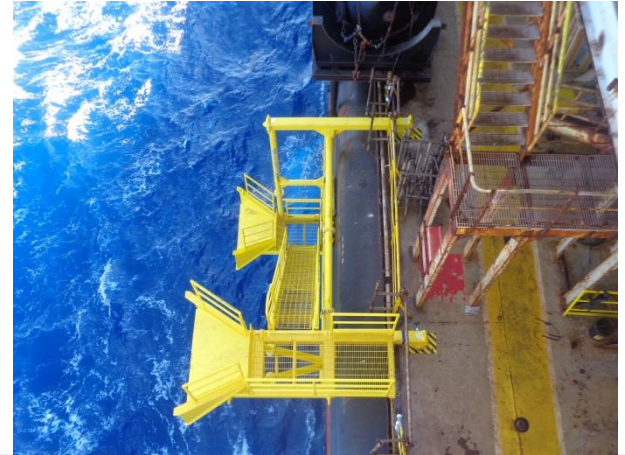

GANGWAY ACCESS PLATFORM

CANSING TONG POSITIONING ARMS

GANGWAY ACCESS PLATFORM (2)

HULL CRACKS REPAIR (APPROVED BY CLASS)

OFFLOADING STATION

OHT CRANE FULL OVER HAUL

RIZER GANTRY CRANE REPAIR

BOP TRANSPORTER OVER HAUL

WINCH REPAIR
